1958 The first Case 4-WD wheel loader, the W9.

1992 Case expands its wheel loader range with 21B, 121B, 221B and 321B models.

1998 Ride control on loader backhoes and skid steer loaders: another Case first.

2001 The exclusive Cooling Cube in Case wheel loaders means clean engine, reliability and massive bucket payloads.

2005 The E-Series compliant with EU Stage IIIA / Tier 3 regulations and with High Travel Speed option is launched.

ENGINE PERFECT IN EVERY MISSION

LOW EMISSIONS

FPT, in-house advanced engine technology

Case equipment features the advanced in-house engine technology developed by sister company FPT Industrial that pioneered low emissions, high efficiency solutions for on- and off-road applications. With a broad portfolio of technologies and products, FPT brings to Case customers the competitive advantage of powertrain technologies that reliably delivers high performance with low operating costs – proven technologies from a global engine manufacturer that produces as many as 600,000 engines a year.

- 3.4 liter 4-cylinder Turbocharged Multiple Injection High Pressure Common Rail Engine with Waste Gate for optimum turbo pressure stability
- Tier 4 final / EU Stage IIIB compliant using **Maintenance Free** Technology:
 - The DOC produces NO₂ by the oxidation of NO
 - Particulate Matters (PM) are trapped in the PM-Catalyst. The reaction with NO₂ convert PM's into carbon dioxide (CO₂) and pure nitrogen (N) passively.

F-SERIES COMPACT WHEEL LOADERS

OUTSTANDING STABILITY

Oscillating rear axle

The combination of the articulated joint and the rear oscillating axle reduces maximum cab oscillation by 50% or more.

MILLIMETRIC CONTROL

Inch and brake pedal

It progressively disengages the transmission during the decelerating phase and progressively engages the brakes.

PRODUCTIVITY AND PRECISION IN EVERY MISSION

HIGH PAYLOAD

Handle heavier pallets

LOW CAB PROFILE

Take the shortest path

No waste of time with the reduced cab height:

- 21F and 121F: 2.46 m
- 221F: 2.63 m
- 321F: 2.68 m

You can always take the shortest path from point A to point B - in indoor jobs or when transporting on a truck.

SUPERIOR DUMP HEIGHT

Centred and higher loading

The superior hinge pin height and the Case “banana” arms make it easy to load at the centre of the trailer without touching the edge with the arms.

EASY PALLET LOADING

Linkage: Mechanical self-levelling on XT and Z-bar

Z-bar is the most versatile linkage type. It offers more breakout force thanks to the 2 lifting cylinders and a higher dump height.

XT is the best linkage for pallet handling. Visibility on the pallet is the best with one lifting cylinder only and payload is optimum
