HIGH EFFICIENCY

Clean engine and Auto-idle system

- Proven, reliable, fuel efficient, low emission and low noise Kubota T4 Final / Stage IIIA engine (CX26C).
- Reliable and environmentally friendly T4 Final / Stage IIIA Yanmar engine (CX37C).
- Standard "Auto - idle" on CX37C: The engine automatically decelerates to idling speed after five seconds of inactivity. This means less fuel consumption, less noise and less overall wear.

HIGH VERSATILITY

Match different customer needs

- **Working range**
 - Dig further with C-Series Minis: maximum reach is now + 10 % higher compared to the previous series.
 - Load high-sided trucks easily: best-in-class dump clearance combined with superior stability make truck loading an easy task.
 - Save time: C-Series Minis deliver faster cycle times in every combined operation, thanks to their excellent boom slewing speed.
 - Choose the most suitable arm for you: C-Series Minis match different customer needs, high breakout force with short arms or outstanding digging depth and reach with long arms.
- **Attachments:** get the most of your CASE mini with the integrated range of attachments.
- **Lifting:** Both models can be fitted with an additional bolt-on counterweight that further increases stability and lifting capacity. For safe lifting operation machines can be fitted with a certified Object Handling Kit.
- **Travel:** both models have the standard «auto shift-down» feature that optimizes travel speed and traction. Travelling in 2nd speed the machine automatically shifts to 1st gear if it needs more traction, then automatically shifts back to 2nd gear when no extra traction is required and travel speed can be increased.

COMFORT COUNTS

Comfortable and durable cabin with suspension seat

- CASE CX26C and CX37C feature a roomy cab with reduced sound levels and excellent visibility. Ergonomically placed joysticks and adjustable wrist rests make the Operator station a pleasant place to work in.
- Standard equipment: weight adjustable suspension seat, radio USB with 2 speakers, foldable pedals, multiple storage compartments, Air conditioning (optional for CX37C).
- Sliding fold-in front window easy to open and safely stored in an open position to improve ventilation and visibility (Cab type).

SAFETY FIRST

C-Series Minis: no compromise on safety

- **ROPS / TOPS / FOPS:** all C-Series models and versions comply with Roll-Over / Tip-Over and Falling Objects –Protective-Structure requirements.
- **Emergency stop switch:** CX26C and CX37C have as a standard feature a switch that immediately stops the engine in case of an emergency.
- **Pilot system with accumulator:** this standard feature allows the operator to put the attachment down safely even with engine turned off for greater safety.
- **Travel alarm:** an acoustic alarm alerts the people near the machine when it moves forward or backward. This feature is optional on both CX26C and CX37C.
- **Blade safety valves:** prevent the load from slipping or dropping due to hose failure (optional on CX37C).
- **Double-flange rollers:** de-tracking can be dangerous for the operator and the people near the machine. CASE C-Series minis have a double-flange roller design that minimizes the risk of de-tracking.
- **Zero Tail Swing (ZTS):** the ZTS design means no risk of hitting obstacles with the rear of the machine when swinging, and creates less obstruction to road traffic.
- **Object handling kit:** includes safety valves on boom and arm, lifting hook on bucket linkage, and an overload alarm to handle heavy weights safely.

MODERN AND FUNCTIONAL CLUSTER

Easy-to-read digital cluster

- The digital cluster is easy to read, confers a modern look to the operator station and provides useful information:
- Gauges: fuel level, engine coolant temperature
 - Info and warning lamps: hydraulic QC lamp, travel speed, engine coolant temperature, engine oil pressure, battery charging, low fuel level

PEACE OF MIND ESL Anti-theft

- All C-Series minis are equipped with a standard anti-theft. It is an Engine Start Limitation (ESL) requiring a 5-digit code that can be set by the operator
- 3 possible settings:
 1. Always: ESL is engaged every time the machine is shut off
 2. Interval: ESL is engaged after a pre-defined interval of shut off engine
 3. Disabled ESL: ESL is not active

All models are Site Watch telematics pre-wired.
